EXPERIENCE

AI SYSTEMS ENGINEER // TECHGEN PRO

SEPT 2025 - PRESENT

- Engineered CI/CD pipelines with GitHub Actions to automate testing and deployment of AI-driven solutions, achieving 99% uptime.
- Architected and deployed workflows using n8n and Node.js, increasing processing efficiency by 40% through automated data extraction.
- Developed scalable backend pipelines for integrating LLMs with vector databases, enhancing query accuracy for technical support.

DATA ANALYST INTERN // RELIANCE INFOSYSTEMS

JAN 2025 - JULY 2025

- Designed and implemented data models in Power BI, yielding actionable insights and facilitating decision-making.
- Automated analytics workflows, including testing and reporting, improving consistency and tracking by 30%.
- Validated data integrity for downstream analytics using Python and SQL, ensuring reliability for AI implementations.

PROJECTS

GENAI-POWERED DEVELOPER ASSISTANT

React, TypeScript, Python (Flask)

- Built a chatbot plugin that integrates seamlessly into existing applications for enhanced developer support.
- Implemented AI-driven features for real-time assistance and transaction queries, improving user satisfaction.

JOB APPLICATION ASSISTANT CHROME EXTENSION

Node.js, JavaScript, Pinecone, AWS

- Developed a Chrome extension utilizing RAG for personalized job application assistance, increasing user engagement.
- Engineered backend systems for document retrieval and context generation, streamlining the job application process.

EDUCATION

MACEWAN UNIVERSITY

Bachelor of Science in Computer Science (Minor in Mathematics, With Distinction)
